Turnove * 10.

> OEM Ti rn Over Criteria: The minimum average annual financial turnover of the OEM of the affered product during the last three years, ending on 31st March of the previous fin inclai year, should be as indicated in the bid document. Documentary evidence e in the form of certified Audited Balance Sheets of relevant periods or a certificate f rom the Chartered Accountant / Cost Accountant indicating the turnover details for t he rele rant period shall be uploaded with the bld. In case the date of constitution / in corpor: tion of the OEM is less than 3 year old, the average turnover in respect of th e completed financial years after the date of constitution shall be taken into account for this criteria. In case of bunch blds, the OEM of CATEGORY RELATED TO primary pr oduct i aving highest bid value should meet this criterion.

11. OEM

IMPOR' ED PRODUCTS: In case of imported products, OEM or Authorized Seller of OE M shou d have a registered office in India to provide after sales service support in In dia. The certificate to this effect should be submitted.

12. Purchas : Preference (Centre)

As per >PIIT notification at the time of e-tender , bidding or solicitation the bids shall be required to indicate percentage of local content and provide self-certification (by Directo / Company Secretary) and also give details of the location/s at which value ad dition i made". Since the bidder here is not the local supplier, the same was required to be o tained from the "Class-I local supplier /Class II local supplier"

Further the details of Calculations of local content areas under:

Questic 1 1. How to calculate Local Content?

Answer Para 2 of the PPP-MII Order, 2017 (as amended on 16.09.2020) defines local content as

Local content' means the amount of value added in India which shall, unless otherwis

prescril ed by the Nodal Ministry, be the total value of the item procured (excluding n et

domest c indirect taxes) minus the value of imported content in the item (including all custom duties) as a proportion of the total value, in percent.

Mathen atically,

= The Ar

Local content = (Sale price - Value of Imported content) * 100/ Sale price

Where, 'Sale price" means price excluding net domestic indirect taxes and "Value of importe i content" means price of imported content inclusive of all customs duties

Questic 12. How to calculate Local Content in bids involving supply of multiple items fr om sing e bidder?

Answer In case of bids requiring supply of multiple items (say "X1", "X2" and "X3") by a sin le bidder, the local content in the bid shall be

Local cc ntent = ((Sale price of "X1" - Value of imported content in "X1") + (Sale price of "X2" - Value of imported content in "X2") + (Sale price of "X3" - Value of imported content in "X3")) * 100/ (Sale price of "X1" + Sale price of "X2" + Sale price of "X3") Accessed Morth

Fit or Brende

<u>Tech</u> <u>ical Specifications Heart Lung Machine (Cardio Pulmonary</u> <u>Bypass Machine) and Accessories</u>

irt A.	
S. No	Heart Lung Machine
1.	The Machine should switch-on within 15 seconds. The unit should have at least 5 large pumps. These pumps can be used as an arterial, suction, vent and cardioplegia with separate power supply and control modules.
. 2.	Should have easy access connectors for interchanging the pump.
3.	The pumps should show accurate measurements and the machine should be capable of being used for performing all types of cardiac surgeries.
4.	Pumps should have direct drive system or belt drive system. Each Module should work on its own.
5.	Machine should show all warnings and alarms in a complete text message and have audible tones.
6.	Machine should be able to configure all thresholds, alarms, settings, and pump assignments in up to 12 different user profiles
7.	Should have a spill proof base.
8.	All the pumps should have individually controlled knobs allowing fine tuning and coarse adjustment of flows.
9.	All the pump heads should be rotatable to optimise the tubing length and contribute towards minimizing haemodilution.
10.	The unit should be supplied with a battery backup of minimum of 60 minutes. Switch over from main power to battery backup should be automatic and immediate. The battery unit should be built into the pump base, and it should immediately and automatically recharge with battery test information and time remaining feature. The machine should be able to start on battery.
11.	Should have hand crank facility as a safety feature. Pump should give audible sound if rotated in wrong set direction or should be unidirectional.
12.	The display monitor should have an option to show up minimum of 2 timers.
13.	Pressure sensor and level sensor should have 2 modes - Stop Mode & Control Mode/alert mode.
14.	The machine should be supplied with following minimum safety modules: i. One Pressure module with 2 pressure monitoring outlets. ii. One Bubble module with ability to connect to sensors. iii. One Flow Sensor to get the measured flow (should be optional) iv. One Level sensor. v. One Temperature module with ability to measure up to two different temperatures.
15.	The maching should have ability to deliver cardioplega.
16.	The machine should be provided with mechanical gas hlender.

7.	Optional feature: Inline Blood Parameter Monitorin parameters with possibility to control from the main	display of machine.
	Optional feature - Patient monitor with the machine stores all parameters from Heart Lung Machine and Devices available within the operating theatre like a blood gas analysers and ACT devices.	which continuously displays and can support up to 6 External naesthesia monitor. NIRS monitors,
:).	Optional feature -Patient Monitor with an option to e Electronic Medical Records.	onnect through HL7 to Hospital

<u>Part B</u>

;

S. N .	Heater Cooler Machine
1	The unit shall be capable of supplying water of temperature 3 - 41 degree Celsius for patient circuit, 2-10 degree Celsius for Cold cardioplegia and 15-41 degree Celsius for warm cardioplegia circuit.
2.	The unit should have 3 independent tanks and 2 separate circuits, and these circuits should be able to control patient's temperature and also heating and cooling of cardioplegia and should work simultaneously. It should have an easy de-airing process and an easy drainage system.
3.	The accuracy should be at least 0.1 degree Celsius. Settings should be adjustable to approx. 0.1 degree Celsius.
4.	The heater cooler unit should also be compatible to get integrated into the heart lung machine.
S .	Warranty: Standard 5-years warranty plus 5 year CMC

TECHNICA 'S SPECIFICATIONS OF HEART LUNG MACHINE AND HEATER COOLER MACHINE-

A. HEART LUNG MACHINE

1. DESCRI PTION :

Heart Lung N achine is an apparatus through which blood is temporarily diverted, during heart surgery, to oxygenate it and pump i throughout the body, thus maintaining circulation until the heart and lungs are able to return to normal functioning.

2. TECHN CAL SPECIFICATIONS:

- 1. The systen should work on 220V/50Hz, single phase AC.
- 2. The unit hould be supplied with a Battery backup of minimum of 90 minutes. Switch over from main power to battery by skup should be automatic and immediate. The battery unit should be built in to the pump base and it should be recharged automatically and immediately.
- 3. Two unic rectional hand cranks should be available as an additional critical safety feature.
- 4. The unit ind should have 3 single pumps and 1 twin pump (5 console pump) can be used as arterial, suction, vent and cardi plegia with separate power supply and control modules. Should have easy access connectors for interchan ing the pump. The pumps should show accurate measurements and the machine should be used for performir ; paediatric and neonate surgery. The small pump should be able to incorporate tubing sizes 1/4" and 3/8".
- 5. The desig of pump must be horse shoe race way design and the pumps should have direct drive system and maintenar \approx free. All the Pumps should have pulsatile mode option in built. Each module should work its own.
- 6. The base : which can be mounted on the base or on the pole close to the surgical field to minimize tubing lengths and also the floor space. There should be option for selection codesired number of pumps. (Dual pump will be counted as only one pump). The base should be spill proof.
- 7. Each head hould be controlled individually and rotatable in different direction with master slave control.
- Pump shou d display tube size, RPM rotation directions, speed flow rate, safety, status and error message.
 Machine sl buld show all warnings and alarms in complete text message and different audible tones with different colour code lgs.

 colour codi igs.
 9. Facility of 1 ionitoring all patient parameters ; pumps status, patient information entered or system setting should "The status" be available on the touch screen of the central control monitor. One touch should provide any menu on the screen,

- 10. The screen hould automatically change if any alarm condition arises thus altering the perfusionist to take
- immediate 1 medial action. Important patient parameters should remain displayed.
- 11. Accuracy: (cclusion accuracy should be 0.015mm, Occlusion rollers accuracy should be adequate.

Saimed in novation

ISO 9001:20 5 156A, Lenin ! arani, # 412, Kamalalaya Centre, Kolkata - 700 013, India Tel. : +91 33 1062 7462, Fax : +91 33 2215 6067, E-mail : acct@saimed.in / info@saimed.in Website : www.saimed.in

- 12. Occlusi n: Should have Thumb wheel locking Mechanism
- 13. Monitor : Pressure monitor (2 nos), Timers(3 nos), Temperature Monitor(4 nos) and all the monitors should be touch so yen.
- 14. The cent al control monitor should be able to configure 10-14 different perfusion screens for different equipment setups at 1 perfusion protocol setups.
- 15. Pressure Sensor should have 2 modes Stop Mode & Control Mode.
- 16. Cardiop sgia module should have both Manual as well as Automatic operation.
- 17. Facility 1 is setting Cardioplegia volume, dose delivery and time on the Central Control Monitor should be available
- 18. There sh uld be option for master follower operation for multidose cardioplegia.
- 19. Should I : provided with mechanical gas blender.
- 20. Should t provided with Level Sensor and air Bubble sensor/detector.
- 21. Bubble : msor should have different bubble detection thresholds including even micro-bubble detection function:
- 22. Level se sor should be with 2 modes Normal & Control Mode.
- 23. Must have inbuilt Master UPS shows all the details like Battery time, Load time & Remaining time. Should have BS/ Calculation

3. ACCESS)RIES

- 1. Level Se sor strips (100 nos)
- 2. Pressure tansducer (100 nos)
- 3. Pressure anschucer cable (4 nos)
- 4. Each unit should be supplied with standard accessories, 2 skin temperature probes and 2 air temperature probes
- 5. Stainless teel line clamps x 12 nos.
- 6. Stainless teel intracardiac suckers (2 Adult, 2 Pediatric)

B. HEATER COOLER MACHINE

1. DESCRIP ION:

The heater of the body which is required in different phases of cardiac surgery

2. TECHNIC L SPECIFICATIONS:

- 1. The unit she | be capable of operating continuously in ambient temperature of 2 40.5 degree Celsius.
- 2. The unit she ild have 3 independent tanks and 3 separate circuits and these circuits should be able to control

-1-

patient's ten perature and also heating and cooling of cardioplegia and should work simultaneously.

3. The accuracy should be 0.1°C. Settings should be adjustable to 0.1°C
